Professional Experience

Profile

- Motivated and detail-oriented BSCS student at UMT with hands-on experience in web development, Python programming, and database management. Eager to grow in the software development field through continuous learning and practical experience.

2023
-
2027

Education

- BSCS, University of Management and Technology, Lahore
- October 2023 — August 2027
- Contributed to web development projects using HTML, CSS, and JavaScript.
- Applied Python, C++, and OOP concepts to real-world coding tasks.
- Worked with databases for backend integration and data handling.
- Improved problem-solving, debugging, and team collaboration skills in a development environment.

Projects

E-commerce App (Database Design using MySQL)

- Designed a functional database structure for an online shopping app using MySQL. Included product listings, user accounts, orders, and payment modules with relational schema and queries.

Hotel Management System (using Data Structures in C++)

- Developed a hotel room reservation system using core data structure concepts like arrays, linked lists, and queues. Focused on efficient room allocation and customer check-in/check-out logic.

Resume Maker App / Website (Web Development Project)

- Built a fully responsive resume builder web app using HTML, CSS, and JavaScript. Allowed users to input data and generate printable CVs dynamically with user-friendly UI.
